

RFMS Cloud Protection

Backup and update services just got better.

RFMS Cloud Protection includes peace of mind.

For clients with on-premise RFMS servers that need RFMS backup and update services. RFMS Cloud Protection includes:

- File and folder backup of the RFMS Database
- 1 RFMS Update per month
- 5 day data retention
- Backups run daily after hours (hourly backups are available for an additional fee)
- Quarterly DB restore testing is included

Cost Effective		Requirements
1st DB	\$100 per month	Server 2008 R2 or later
2nd DB	\$50 per month	High speed internet
Each additional DB	\$25 per month	Best practices software configuration
One-time setup fee	\$195	Does not cover SQL database corruption

RFMS in the Cloud will floor you.

Save Time and Money

Get even more for your business with no new hardware or network set up required. Plus lower upfront costs to start using RFMS with reliable IT support from Isogent, boosts your business productivity from day one.

Be More Secure

In Isogent's cloud, you're always in control of your data. We simply host it in a secure data center with five network carriers on two power grids with anti-virus protection and automated backups so you can reap the benefits of fast, reliable cloud service.

Maintain Flexibility

Get the latest updates and features from RFMS with a simple log in your cloud from anywhere. Customize your cloud services with SQL customizations and additional services.

Customize Your Cloud Stack

Reap the benefits of competitively priced high-speed Internet and easily add VPN connections, file services, data backups, workflow and print or paperless solutions.

Add Microsoft Solutions

Upgrade to Office 365 for email, Intune for device management, Active Directory to automate network management and Microsoft Office to improve your productivity.

Flexible Delivery Options

Access your cloud services via published application, remote desktop services, terminal server access, a Virtual Desktop (VDI) and even an iPad.
